Md. Shariful Islam

Software Engineer | Microservice | Docker | Kubernetes | Laravel
Dhaka, Bangladesh

Summary

Web Developer, specialized in backend development. Experienced with developing dynamic web projects with multiple frameworks such as express, Laravel, ASP.NET, and Spring Boot. Also experienced with front-end frameworks like React.

Dreams were not like to become a software engineer or system admin from the early days when computers were like some mystery box packed with unfilled thirst. Entering university life, these dreams became clear day by day. I took myself into networking to become a 'System Architecture'. But it didn't last long because of less innovative achievements to acquire at the beginning. Learning new technologies took me into the remote computing world, Web Technology. After making my hands dirty in the backend development, I finally found myself in an area where I can acquire more & more, attached to my aspirations.

Experience

6amTech

4 years 1 month

Senior Software Engineer

January 2024 - Present (1 year 6 months)

Software Engineer (Grade I)

February 2022 - January 2024 (2 years)

Mirpur DOHS

Junior Software Engineer

June 2021 - February 2022 (9 months)

Bangla Puzzle Limited
